

eTEK Accounting Systems

Your choice: web-based *software as a service* (SaaS) or traditional

Top 5 Benefits ... With direct links to illustrative web videos

1. Quality Affordable Software

While eTEK software has consistently earned high ratings from independent CPA's, the key benefit is VALUE! In short, you get "more for less" with eTEK software. Starting price points for complete eTEK systems typically run 50% less than most "brand-name" competitors – yet the features are comparable. PLUS, eTEK users report eTEK systems are easier to use and have more flexibility. [Click here](#) for a 12-min executive overview by the President/CEO of eTEK. [Click here](#) to understand eTEK SaaS benefits; [Click here](#) for product overview.

2. Superior Tech Support

Many eTEK customers have been using eTEK systems for close to 30 years! More importantly, we provide you with an easy way to form your own opinions about our training and support. During a FREE *GoToMeeting™* web demo/Q&A session, you will be able to quickly evaluate the level of knowledge, skills and expertise available to your organization. Your meeting will be conducted by the head of our customer support team, a professional full-time employee of eTEK (not a third-party sales rep/consultant).

3. Easy-to-use

eTEK systems run on all popular versions of Microsoft Windows (including XP, Vista & Windows 7) as well as current versions of Microsoft Office 2007 and Microsoft Office 2010. eTEK's user interface and overall design provides an easy-to-navigate framework fully compatible with Microsoft Office. 4. Flexible

eTEK systems are based on an open, non-proprietary, relational database architecture; combined with 100% user-defined GL account numbering structures (and project/job numbers). You can easily use eTEK for multiple divisions/departments in your organization at no extra cost. Unlike QuickBooks® and others, there are no practical limits on the number of customers, suppliers, and other records. Report Wizards are built-in. 5. Scalable

Starting as small as a single desktop, you can grow as large as desired with eTEK *with no need to re-train users*, or convert to some "other brand" as your business grows. You can start with a small PC-based eTEK SaaS system, then move up to eTEK for Microsoft SQL Server (SQL is capable of supporting thousands of concurrent users). **What is the long-term benefit to your organization of NOT out-growing your accounting & business management software?** <<<< *This is one of the major reasons eTEK has become such a popular choice for growing small/mid-sized business organizations!*

eTEK is an accredited A+ rated member of the Better Business Bureau with numerous consecutive years of Gold Star Ratings!

We are totally committed to your complete satisfaction!
